

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 0111

SESSION NUMBER: 1

DATE OF SESSION: 17 JUN 88

DATE OF REPORT: 17 JUN 88

START: 0907

END: 1041

METHODOLOGY: CRV

VIEWER IDENTIFIER: 025  
-----

1. (S/NF/SK) MISSION: Stage 3 training. Site was the Stanford Linear Accelerator.

2. (S/NF/SK) VIEWER TASKING: Coordinates 3725/1221.

3. (S/NF/SK) COMMENTS: Although two, single, excellent target-related ideograms were finally produced (see p.7), the viewer habitually begins a session by producing only a single, multiple ideogram relating to the overall site. There is nothing wrong with this as long as the representative, discrete, multiple gestalts are broken out into individual "A" and "B" components. This, 025 fails to do, placing all of each gestalt's motion into a single "A". Consequently, even though 025 is aware that a site is composed of multiple gestalts and (usually) what those gestalts are, the viewer continues to get bogged down in Stage 1 because the all the representative motion is run together. This was a major teaching point in today's session. As far as Stage 3 contact was concerned, 025's performance was excellent. (Stage 4's are beginning to creep into the sessions with greater frequency).

4. (S/NF/SK) EVALUATION: [4]
